- Tuesday (10.45 am - 01.45 pm)
- Tuesday (02.30 pm - 04.30 pm)

Description

Electro Power Systems (EPS) is the pioneer of technology-neutral, integrated hybrid energy storage solutions for grid support in developed economies and off-grid power generation in emerging countries. The Group's mission is to unlock the energy transition, by mastering the intermittency of renewable energy sources. Through the seamless integration of the world best battery technologies to provide flexibility, and the Group's unique hydrogen and oxygen storage platform suitable for longer autonomy without resorting to diesel or gas-fueled generators, the group's technologies enable renewable energies to power 24/7 communities in a completely cleaner and less expensive solution. EPS is today listed on the French regulated market of Euronext, and part of the CAC® Mid & Small and CAC® All-Tradable indices: with headquarters in Paris, and R&D and manufacturing in Italy The Group has installed in aggregate 3MW of hydrogen systems, 8.7MW of Hybrid Power Plants, and 44.3MWh of energy storage capacity, for a total power output of 21.1MW deployed in 21 countries worldwide, including Europe, USA, Australia, China, Asia and Africa.
