Energy

Research and Development

Offer & Request

hydropower & small wind turbines

We offer an energy partnership, using fish-friendly certified hydropower turbines in the range of 8kW - 1200kW. We seek local partners willing and able to arrange permits/concessions/contact with authorities to set up clean hydropower projects that do not alter nor harm the environment.

We also seek cooperation to further develop our patented small wind turbine, we have 2 prototypes and a considerable amount of test data.
