Description

The International Hydropower Association (IHA) is a non-profit network of companies and organisations involved in hydropower around the world. Our mission is to advance sustainable hydropower. We work with members and partners active in 100+ countries and will be holding the World Hydropower Congress in Addis Ababa from 9-11 May 2017, with the support of AUC and UN-ECA.

Idea

Bringing the hydropower community to Addis Ababa

From 9-11 May 2017, IHA will be organising the World Hydropower Congress for the first time in Africa. The event, organised in partnership with the African Union Commission, UN-ECA and the Government of Ethiopia, will gather heads of organisations, business leaders and ministers to set the course for hydropower development over the next 10 years.

Cooperation Offered

1. Sales / Distribution
2. Technical co-operation

Cooperation Requested

1. Investment / Financing

Offer

Connecting with the world hydropower community

Our network of companies and organisations involved in hydropower worldwide include: operators, developers, banks, international organisations and governments.

We build and share information and help people solve challenges related to hydropower development including: finance, environmental and social impact, climate change resilience, water management etc.
